Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

Schedule 1 to the Environmental Permitting Regulations has been updated by the Environmental Permitting (England and Wales) (Amendment) Regulations 2013 to reflect the implementation of the Industrial Emissions Directive into England and Wales.

As a result of this, a number of previously permitted waste activities have now been amended to schedule 1 listed activities. These activities are referred to as 'newly prescribed activities'.

This variation is to add to the permit the following newly prescribed activities and subsequently vary the regulated facility from a waste facility to an installation:

- Section 5.3 A(1)(a)(ii), Disposal or recovery of hazardous waste with a capacity exceeding 10 tonnes per day involving physico-chemical treatment.
- Section 5.3 (A1)(a)(iv), Disposal or recovery of hazardous waste with a capacity exceeding 10 tonnes per day involving repackaging prior to submission to any of the other activities listed in this Section or in Section 5.1.
- Section 5.6 A1 (a)(i) Temporary storage of hazardous waste with a total capacity exceeding 50 tonnes pending any of the activities listed in Sections 5.1, 5.2, 5.3 and paragraph (b) of this Section, except:
 - (i) temporary storage, pending collection, on the site where the waste is generated, or
 - (ii) activities falling within Section 5.2.

Natural Resources Wales has also taken this opportunity to produce a consolidated permit in the modern 'EPR' format.

The existing waste facility which undertakes storage of plastic pending any of the operations numbered R1 to R12, remains in the permit as a separately listed waste activity and is not altered by this variation.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number
