Croeso i Gwm Rhaeadr

Rhwyd gynnig ar y llwybr hamddenol hygrych, llwybr y rhaeadr sy'n hirach, neu'r llwybr beicio mynydd cyffrous graddfa goch (gweler paneli ar wahân ger y gât yn nes ymaen ar y llwybr).

Y rhaeadr uchaf yn Sir Gaerfyrddin

Uchafbwynt y coetir yw'r olygfa o'r rhaeadr, sef y rhaeadr uchaf yn Sir Gaerfyrddin, wrth iddi arllwys oddi ar Fynydd Mallaen. Yn ystod gaeafau caled pan fydd yn rhewi, clywyd sôn fod dringwyr rhew eofn yn rhoi cynnig ar y ddringfa heriol hon.

Coed Mawr Ifanc

Coetir cymysg yw hwn sy'n cynnwys coed llydanddail brodorol a chonwyd estron. Cafodd y ffynnydd Douglas mawr a welwch yma eu plannu yn 1947. Coed ifanc yw'r rhain o gymharu â'r coed anferth sy'n tyfu yn eu cynfin naturiol ar arfordiordd gorllewinol Gogledd America.

Welcome to Cwm Rhaeadr

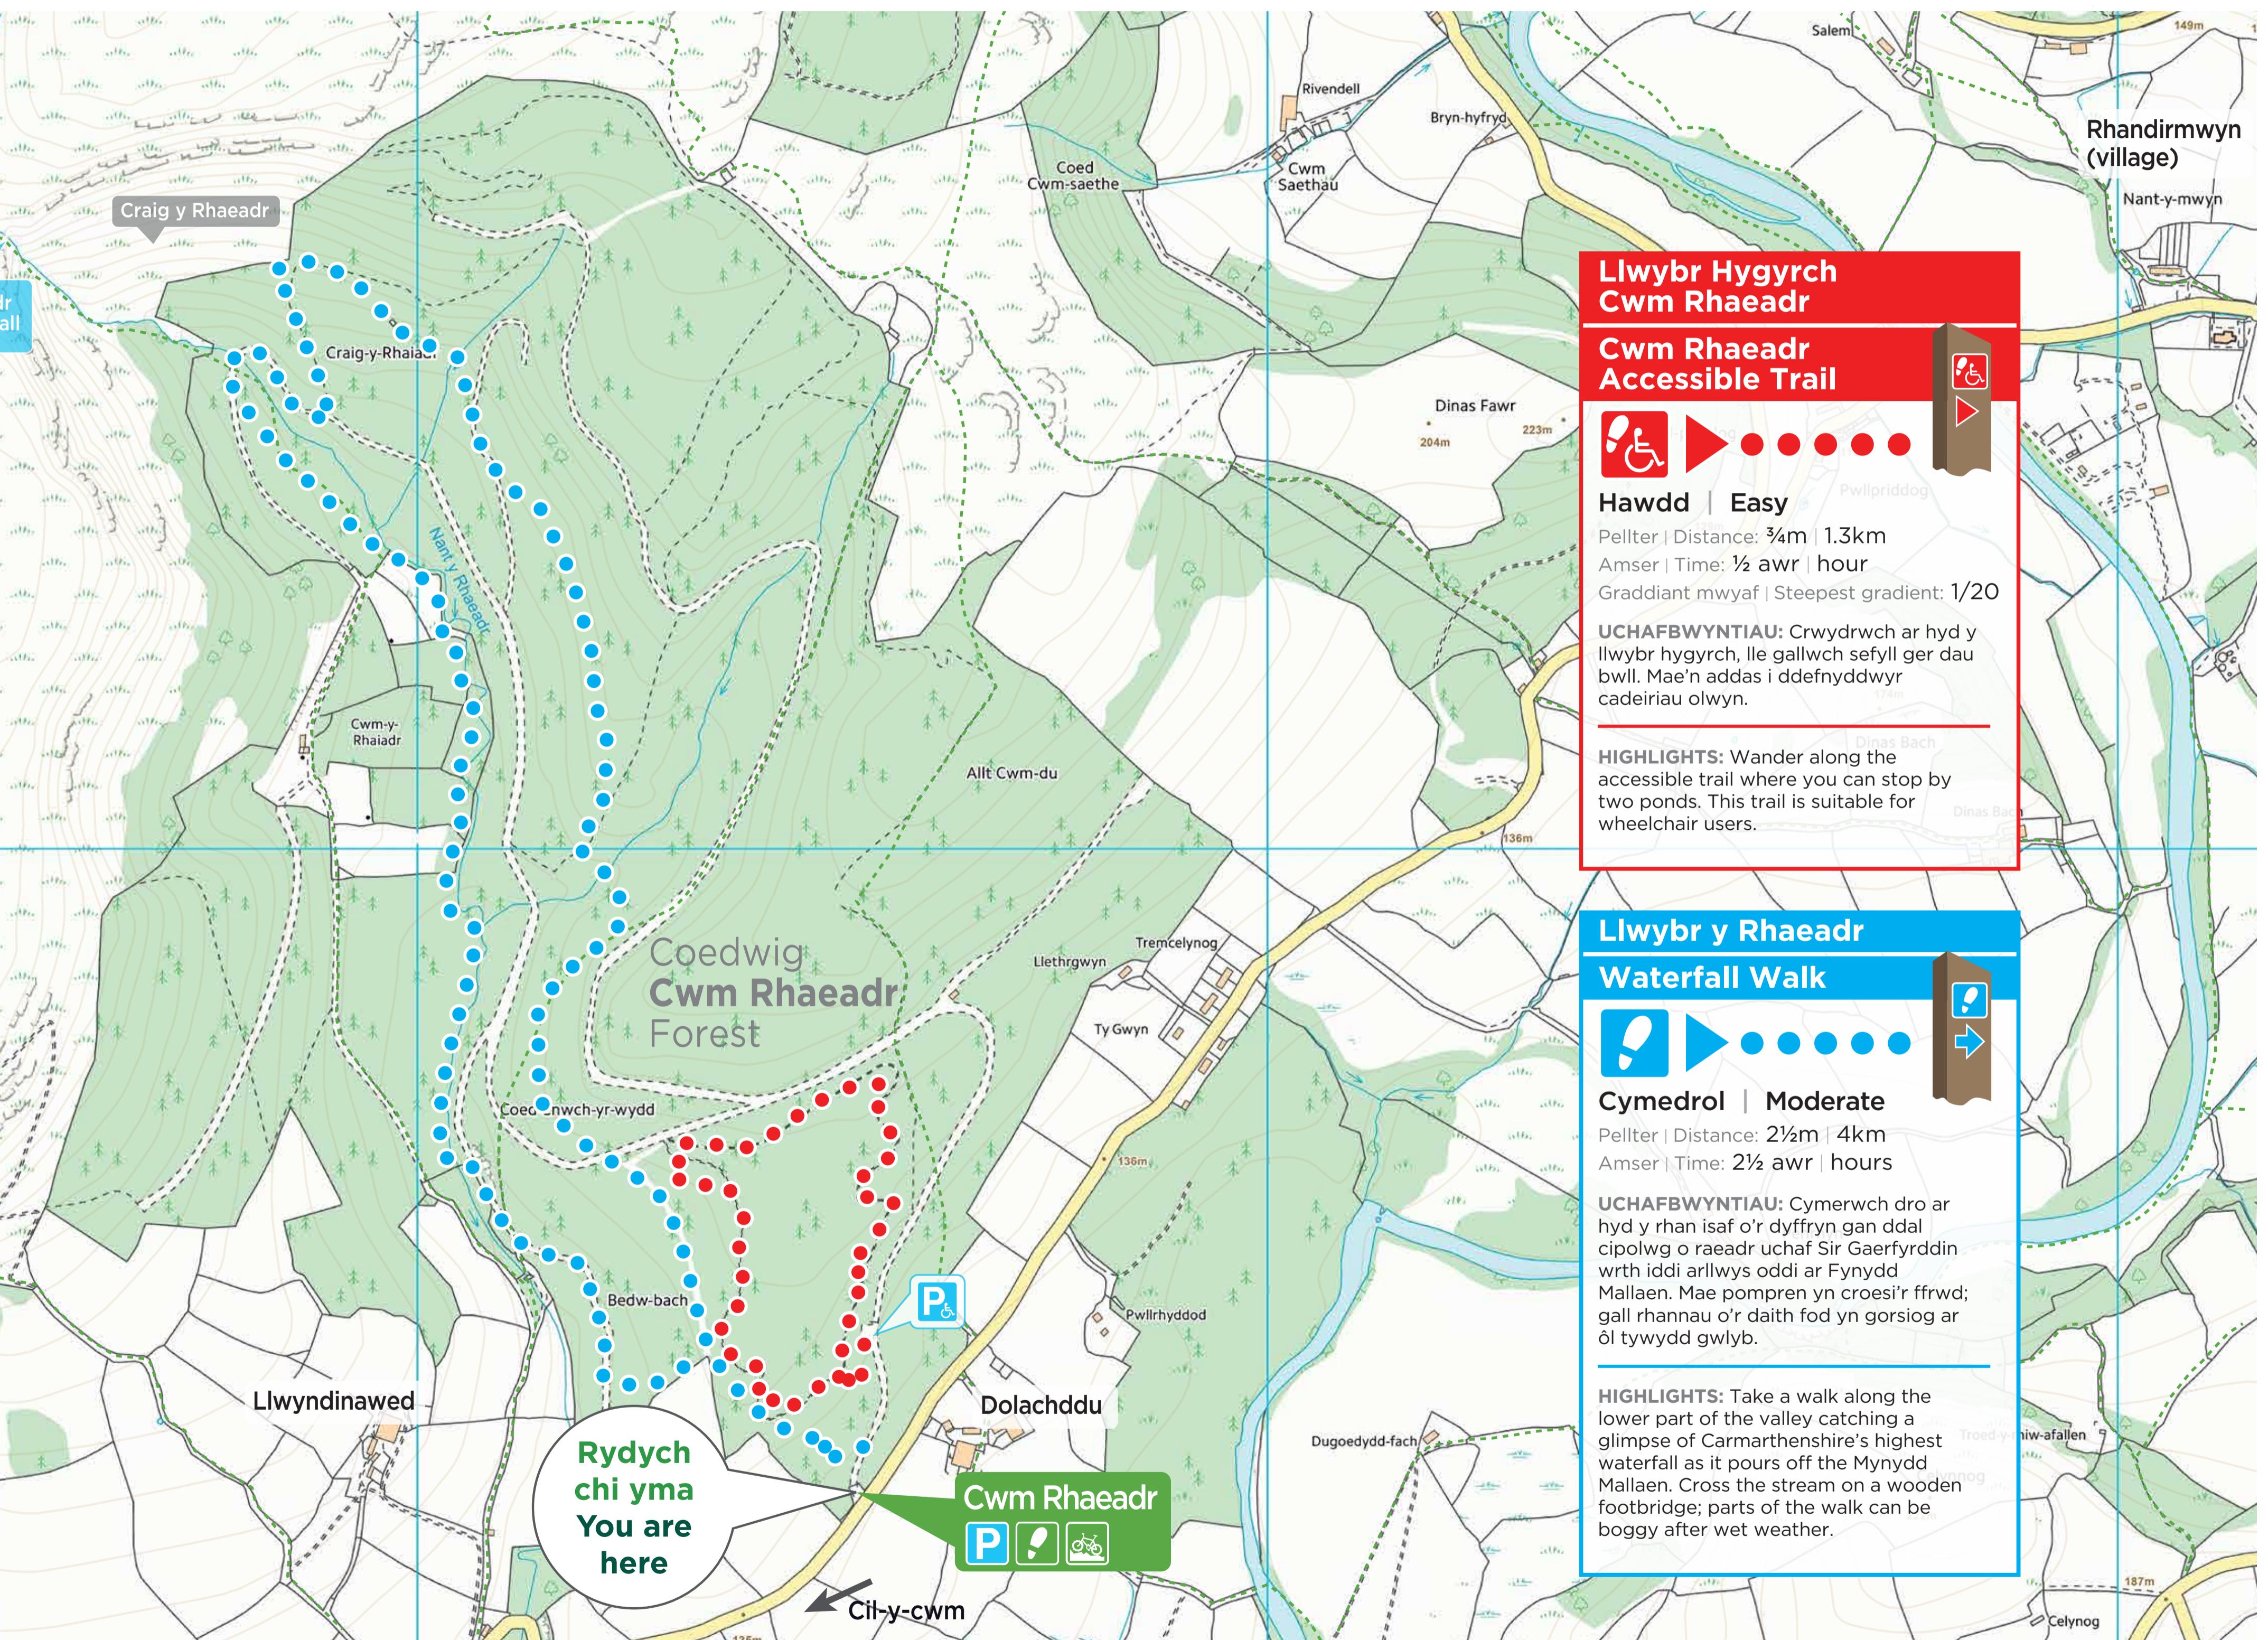

Cwm Rhaeadr means 'valley of the waterfall'. Try the gentle accessible walk, the longer waterfall walk, or the exciting red-graded mountain bike trail (see separate panels by the gate further up the track).

Highest waterfall in Carmarthenshire

The highlight of the woodland is the sight of the waterfall, the highest in Carmarthenshire, as it pours off the Mynydd Mallaen. In hard winters when it freezes, intrepid ice climbers have been known to test their nerve on this challenging climb.

Baby big trees

This is a mixed woodland, with native broadleaves and non-native conifers. The big Douglas fir trees you see here were planted in 1947. These are mere youngsters when compared with the giants growing in their natural range in the western coasts of North America.
